

**BALLISTIC BLANKET**  
**BOMB SUPPRESSION BLANKET**  
**BOMB / FRAGMENTATION BLANKET**

**What is a Bomb Blanket?**

The Bomb Blanket has been designed for use by both unskilled personnel as well as by skilled Explosive Ordnance Disposal (EOD) operators when confronted with a suspect explosive device in a public area. Bomb Blankets are made of multiple layers of treated KEVLAR fabric and enclosed in a durable, water resistant, flame retardant nylon cover. Four heavy-duty nylon webbing loop handles make it easy to carry the blankets.

**Where can they be used?**

Bomb blankets provide a portable, flexible, lightweight and multi-purpose means of ballistic protection. These are quite effective against shrapnel and fragments from hand grenade, bombs, IEDs etc. These are also particularly useful during de-mining operations and by bomb disposal squads. This blanket is very versatile and can even be adapted to be used as a ballistic blanket during different modes of operation.

<b>BOMB BLANKET- SPECIFICATIONS</b>	
<b>V 50 (17-grain Steel Fragment)</b>	> 712.9 m/s
<b>Blast Protection</b>	A blast of max. 100 gms of High Explosive or equivalent
<b>Weight</b>	24.5 Kgs (+/- 1.5 kg)
<b>Size</b>	1.5 m x 1.5 m
